Re: Application of Wisconsin Public Service Corporation for a Certificate of Authority to Acquire a 99 MW Wind Generation Facility in Jamestown and Oakdale Townships, in Howard County, Iowa — 6690-CE-194

Dear Mr. Kyto:

The Commission Order for docket 6690-CE-194, mailed May 23, 2008, contained an order point that Wisconsin Public Service Corporation (WPSC) questioned as being broader than was intended. Order Point 7 on page 13 of the order reads:

> 7. WPSC may not earn a return from ratepayers on any expenditures associated with the construction of the interconnection to the grid.

You pointed out that some of the expenditures associated with the construction of the interconnection are related to assets that will be owned by WPSC and not transferred to the transmission owner. The intent of this order point was to not allow a return on expenditures associated with the construction of the interconnection that are related to assets that will be owned by the transmission owner. To clarify the intent of the Commission with respect to this issue, Order Point 7 in this docket will be replaced with the following language:

> 7. WPSC may not earn a return from ratepayers on any expenditures associated with the construction of the interconnection to the grid that are related to assets that will be transferred to the transmission owner.

In addition, the order incorrectly states that total cost for the project, $251,000,000, includes allowance for funds used during construction (AFUDC). WPSC estimates that AFUDC would add approximately $15,000,000 to the project cost. As such, the authorized total cost of the project is changed to $266,000,000. Order Points 1 and 2 should be revised to reflect this amount.

Pursuant to Wis. Stat. § 196.39(4), the Commission may correct an error in an order without a hearing within 30 days of its issuance if the correction does not alter the intended effect of the decision.

Sincerely,

Sandra J. Paske
Secretary to the Commission
