1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Number of distribution system valves end of year:	59
Number of distribution valves operated during year:	59

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less $2,000, please explain.

Account 600 - Wages are allocated between the water utility and nonregulated sewer utility based on actual hours worked. More time was required for the operation of the sewer utility during 2007 and therefore less time was spent on water utility operations.

Meters (Page W-19)

Explain all reported adjustments.

Utility personnel counted the actual meters and verified it to the number reported on the PSC report. As a result of the actual count an adjustment was required.

If Tested During Year column total is zero, please explain.

The Utility replaces meters regularly and therefore does not test them because the Utility has determined that it is not cost effective for them to do so.

Explain program for replacing or testing meters 1" or smaller.

Meters 1" and smaller are replaced within every 10-20 years on a rotating basis.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes - station meters are tested at least once every two years.
