Wisconsin Utilities Association

Re: Withdrawal of a portion of comments on Docket 1-AC-238

Date: October 15, 2013

WUA withdraws the suggested revision of PSC 114.003, which read as follows.

“(b) The Commission intends for non-utility owned structures to be constructed in a manner that complies with Volume 1, Wisconsin State Electrical Code. In this regard, the Commission may order the utility not to provide electric service to an end-use customer until the non-compliant installation has been brought into compliance with the requirements of Volume 1, Wisconsin State Electrical Code, though some portions of the code may not be directly enforceable by state agencies.”

Please note the withdrawn portion of this comment is numbered as rule PSC 114.003(2)(b) in WUA’s suggested wording. Because WUA suggested Parts (a) and (b) of this be sequentially reversed, the rule was numbered PSC 114.003(2)(a) in the PSC proposed rulemaking. I point this out simply so this request to withdraw a portion of the comment is correctly interpreted.

The remaining WUA comments to proposed rule PSC 114-003 are editorial and should be retained for editorial purposes
