

## Amendment No. 1

This Amendment is entered into this \_\_\_\_\_ day of \_\_\_\_\_ 2001, by and between Ameritech Wisconsin ("Telco") and AT&T Wireless Services, Inc. ("AWS") (collectively, the "Parties").

WHEREAS, the Parties entered into a CMRS Interconnection Agreement ("Interconnection Agreement") for Wisconsin approved by the Public Service Commission of Wisconsin on \_\_\_\_\_, 2001; and

WHEREAS, the Parties now wish to amend the Interconnection Agreement as indicated below;

NOW, THEREFORE, the Parties hereby agree as follows:

1. Attachment II – Local Number Portability to the Interconnection Agreement is amended by the following:

?? The following sentence is added at the end of Section II.B.6:

**Notwithstanding the foregoing, Telco will continue to treat fixed wireless NXXs (i.e., NXXs used for fixed wireless services by AT&T Wireless Services, Inc. and its affiliates licensed to provide CMRS ("AWS")) that are assigned to AWS in the LERG) pursuant to this Appendix Local Number Portability, as long as those fixed wireless NXXs are designated in the LERG in exactly the same manner as existing AWS fixed wireless NXXs are designated on the Effective Date (i.e., OCN=6520; OCN Name=AT&T Wireless Services, Inc. - Fixed Wireless Svc; COC Type=PMC; SSC=C; and LOC STATE=WI).**

2. Attachment III – E911 to the Interconnection Agreement is amended by the following:

?? Section II.D is deleted and replaced with the following:

**D. Telco shall provide AWS with a list of E911 Control Offices and the PSAPS served by those E911 Control Offices.**

?? Section II.E is deleted and replaced with the following:

**E. Telco shall provide AWS with a file containing the Master Street Address Guide (MSAG) in accordance with the methods and procedures described in the**

**document "Ameritech 9-1-1 Product Guide" and as subsequently modified consistent with industry standards. The MSAG will be provided on a routine basis but only for those areas where (i) AWS is licensed by the FCC to provide service, (ii) AWS is or intends to be providing fixed wireless services and (iii) Telco is the 911 service provider. Telco shall provide AWS subsequent additions or updates to the MSAG in accordance with the intervals specified in Exhibit I. In addition, Telco shall provide AWS with a statistical report in a timely fashion and in accordance with the methods and procedures described in the above mentioned document for each file downloaded by AWS to Telco's DBMS, so that AWS may ensure the accuracy of the end user records. The Ameritech 9-1-1 Product Guide is referenced herein solely for the purpose of addressing methods and procedures by which Telco is to provide the MSAG and statistical report mentioned herein.**

?? The following parenthetical is added at the end of the introductory clause to Section II.F and immediately before the colon:

**(or by agreement of the E911 customer, by dedicated trunks using SS7 protocol in areas served by an E911 Control Office capable of supporting SS7 connectivity for E911)**

?? Subsection II.F.3 and Section II.G are deleted and replaced with the following Section II.G:

**G. AWS will cooperate with Telco to promptly test all E911 trunks and facilities between AWS' network and the Telco E911 tandem to assure proper functioning of E911 service. AWS will not turn up live traffic until successful testing is completed by both Parties. At a reasonable time prior to establishment of E911 Universal Emergency Number Service, AWS will download and maintain thereafter all information required to establish records necessary for furnishing connection to E911 Universal Emergency Number Service in connection with AWS' fixed wireless service. AWS will adopt and comply with operating methods applicable to downloading and maintaining AWS' end user records in Telco's DBMS. Telco's ALI database shall accept electronically transmitted files that are based upon NENA standards. Manual entry shall be allowed only in the event that DBMS is not functioning properly. Telco will update AWS' End User 911 Records in the E911 DBMS. Telco will then provide AWS an error and status report. This report will be provided in a timely fashion and in accordance with the methods and procedures described in the documentation to be provided to the AWS.**

4. Except as modified herein, the Interconnection Agreement remains unchanged and the parties reaffirm the terms and provisions thereof as supplemented by this Amendment. In case of any conflict between the Attachments referenced in this Amendment and terms and provisions in the

Interconnection Agreement, the Attachments shall govern as to the facilities, trunks and/or services provided pursuant to those Attachments.

5. This Amendment shall become effective 10 days after approval by the Public Service Commission of Wisconsin.
6. This Amendment may be executed in multiple counterparts, each considered an original and together shall constitute one document.
7. This Amendment is made on an interim basis, until the earlier of either (1) termination of the Agreement or (2) until such time as the FCC, the Commission or an appropriate court makes a determination (the enforcement of which is not stayed) that providers of fixed wireless service offered in substantially the same technical manner provided by AWS or one of its affiliated wireless companies in one or more states must be certified as competitive local exchange carriers or should be subject to substantially the same interconnection terms and conditions as wireline local exchange carriers. Telco expressly reserves all of its legal rights and expressly does not waive any position, particularly as to the appropriateness and legality of providing fixed wireless service as a CMRS provider and the need for a true-up to reflect the ultimate decision of applicable regulatory bodies as to how fixed wireless service should be provided by AWS. AWS should not assume that Telco's willingness to provide these interim arrangements is any indication that Telco believes that these arrangements are required by law or the Agreement or can be continued beyond the expiration of the Agreement. Telco also fully reserves its rights, including but not limited to the right to pursue any regulatory, judicial or quasi-judicial action, to determine the appropriateness and legality of providing fixed wireless service in substantially the same technical manner provided by AWS or one of its affiliated wireless companies in one or more states as of the effective date of this Appendix as a CMRS provider. AWS reserves all rights, including the right to pursue or contest before any regulatory, judicial, or quasi-judicial entity the services, terms and conditions contained in this Appendix, and reserves the right to assert that the terms and conditions agreed to on an interim basis by this Appendix are not applicable to AWS.

In witness whereof each Party has caused this Amendment to be executed by its duly authorized representative.
