FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

| Industry (a) | FTE (b) | |
|-----------------|------------|---|
| Water | 30.0 | 1 |
| Electric | | 2 |
| Gas | | 3 |
| Sewer | | 4 |

Each expense account that has an increase or a decrease when compared to the previous year of greater than 15 percent, but not less than \$10,000, shall be fully explained in the schedule footnotes.

WATER OPERATION & MAINTENANCE EXPENSES

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less \$10,000, please explain.

a/n 603 Source Miscellaneous Expense: 17% Increase - Amortization of Preliminary Studies, per 2012 rate case, was to amortize the balance in a/n 183 at \$69,340.50 per month. WWU mis-understood the direction and was amortizing the balance over a 4-year period. The increase in 2014 is for the actual amortization expense to be charged for YE 2014 per PSC.

a/n 614 Source Maintenance of Wells and Springs: 99% Decrease - Rehabilitation of wells 11 and 12 was completed in 2013. Per the PSC, the costs had to be expensed, as it was maintenance and did not extend the life of the wells.

a/n 626 Pumping Miscellaneous Expense: 18% Decrease - In 2014, labor decreased in this account because of the harsh winter and the record number of frozen services.

a/n 633 Maintenance of Pumping Equipment: 24% Decrease - In 2014, labor decreased in this account and maintenance was deferred because of the harsh winter and the record number of frozen services.

a/n 652 Maintenance of Water Treatment Equipment: 38% Decrease - Water treatment filter maintenance for well #3 was done in 2013. In 2014, maintenance was deferred because of the harsh winter and the record number of frozen services.

a/n 660 Operation Supervision and Engineering: 46% Decrease - Labor allocation shift, supervisor time was booked to other accounts based on the 2014 projects and the harsh winter.

a/n 662 Transmission and Distribution Lines Expenses: 29% Increase - Natural gas costs increased in 2014 due to a very cold winter. A locating program called DigTrack was also purchased, which includes monthly fees.

a/n 663 Meter Expenses: 28% Decrease - Less meter change-outs were done in 2014.

a/n 664 Customer Installation Expenses: 24% Increase - Less cross connection inspections were performed in 2014 (done with meter changes). Vacuum breakers were purchased in 2014 and were made available for sale. The offset revenue for these is in a/n 471.

a/n 665 Transmission and Distribution Miscellaneous Expenses: 17% Increase - All inventory items that had lead in them had to be scrapped in 2014, per Federal regulations.

a/n 672 Transmission and Distribution Maintenance of Reservoirs and Standpipes: 91% Decrease - Cleaning and inspecting of Hillcrest reservoir, Hunter tower, Davidson tower, and Meadowbrook tower was performed in 2013.

a/n 675 Transmission and Distribution Maintenance of Services: 180% Increase - In 2014, labor and material purchases increased in this account because of the harsh winter and the record number of frozen services. An increased number of street service tie-overs occurred in 2014 (water main replacement projects). Because the tie-over did not replace more than 50% of the street service, the tie-over has to be expensed.

a/n 677 Maintenance of Hydrants: 20% Decrease - 2014 labor is low in this account because the harsh winter required labor hours to be allocated elsewhere. (Hydrant survey was not done to the extent that had been in prior years.)

a/n 678 Transmission and Distribution Maintenance of Miscellaneous Plant: 22% Decrease - In 2014, maintenance was deferred because of the harsh winter and the record number of frozen services.

a/n 904 Customer Accounts Uncollectible Accounts Expense: 129% Decrease - One large bankruptcy in 2013. 2014 fell to normal level.

a/n 921 Office Supplies and Expenses: 18% Increase - Includes account 9216, minor equipment; frigid winter required the purchase of additional equipment to thaw and repair water services.

a/n 923 Administrative and General Outside Services Employed: 252% Increase - Lobbyist time for the Great Lakes application increased. Redesigned data entry for payroll system in 2014.

PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service (total of utility financed and contributed plant), property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

General footnotes

The Lower Tax Equivalent for 2014 was actually "higher" because we use an equivalent calculated from the 2012 report. Due to timing and budgets, the Utility and City have agreed to this two-year cycle (reported in 2012, calculated in 2013, expensed in 2014). \$1,790,232 was expensed in 2014; however, the program will not allow/save a higher number in this cell. Per PSC, WWU will have to use the number calculated in Schedule W-7 \$1,774,814 and record the difference of \$15,418 in Schedule F-2 under Miscellaneous Debits to Surplus (Acct 435) as a PILOT adjustment.

a/n 397.1 SCADA Equipment: Master PLC upgrades were made in 2014. New communication equipment was purchased for River Place Booster, Highline Booster, and Hunter Tower. New SCADA equipment was installed at Well #2, #5, #6, and #7. Spare touch screens were also purchased for four locations.

If Retirements for Accounts OTHER than 316, 343, 345, 346 or 348 exceed \$100,000, please explain.

a/n 325 Electric Pumping Equipment: Retired pumping equipment replaced and no longer in service.

If Adjustments for any account are nonzero, please explain.

a/n 321 Pumping Structures and Improvements: Transfer Newhall Pump Structure to GP - Site Turned into an Inventory Storage Facility.

a/n 346 Transmission and Distribution Meters: Meters are held in inventory throughout the year. At year-end, they are reclassified to the asset. This entry is reversed at the beginning of the following year. The adjustment is transferring in-stock meters back to inventory for the year 2014.

WATER UTILITY PLANT IN SERVICE --Plant Financed by Contributions--

1. All adjustments, corrections and reclassifications (including to/from plant financed by contributions) should be reported in Column (f), Adjustments.
2. Explain fully as a schedule footnote the nature of all entries reported in Column (f), Adjustments.
3. Explain as a schedule footnote the dollar additions and retirements reported in Columns (c) and (e) for each account over \$100,000. If applicable, provide construction authorization.
4. Use only the account titles listed. If the utility has subaccounts other than accounts 391.1 and 397.1, combine them into one total and detail by subaccount as a schedule footnote.

WATER AUDIT AND OTHER STATISTICS

1. Report actual metered values where possible. If water uses are not metered, estimate values for each line based on best available information. Water entering distribution system must equal the sum of Sales (line 5), Authorized System Uses (line 12) and Water Losses (line 19). For assistance, see AWWWW M36 Manual - Water Audits and Loss Control Programs.
2. For Gallons used in the treatment process (line 3), estimate water used in production including filter backwash, pumps, and other utility uses before the point of entry to the distribution system.
3. For Gallons used for other system uses (line 11), report other unmetered water used for system operation and maintenance, water used for non-regulated sewer utility and all other unmetered usage that is known to occur and does not fall into one of the other categories listed under Water Usage.
4. For Gallons unknown/not accounted for, estimate the volume of water losses due to other real or apparent losses, including customer meter inaccuracies, data errors, and unknown volumes. Unknown/unaccounted for volumes should be minimized to the extent possible.

General footnotes

Regarding footages listed under Column E (Added During Year), the number reported here varies from that used in the Conservation Report because projects that are not financially closed in 2104 are not included in Schedule W-21 and remain in WIP.

If Added During Year column total is greater than zero, please explain financing following the criteria listed in the schedule headnote No. 5.

Column E - # of feet added in 2014 for developers is 1,470.4 feet installed at actual cost. There was 21,812 feet of Utility installed mains and/or infrastructure work.

Explain all reported Adjustments.

An adjustment has been made based on an audit between PSC records and the Utility's GIS records. These adjustments will correct the size, feet, and material of main listed to actual.

1. Explain all reported adjustments as a schedule footnote.
2. Report in column (h) the number of utility-owned services included in columns (c) through (g) which are temporarily shut off at the curb box or otherwise not in use at end of year.
3. For services added during the year in column (d), as a schedule footnote:
 - a. Explain how the additions were financed.
 - b. If assessed against property owners, explain the basis of the assessments.
 - c. If installed by a property owner or developer, explain the basis of recording the cost of the additions, the total amount and the number of services recorded under this method.
 - d. If any were financed by application of Cz-1, provide the total amount recorded and the number of services recorded under this method.

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

In 2014, 9 services were Developer/Contractor installed and are accounted for based on actual cost. 133 services were installed and funded by the Utility. Services installed by a home owner are contracted by that home owner.

METERS

Meters (Page W-23)

Explain all reported adjustments.

Column E: Adjustments are a result of the reconciliation between the end of year report and a physical inventory of all in-stock meters.

If Tested During Year column total is zero, please explain.

Column G:

Explain program for replacing or testing meters 1" or smaller.

The Utility uses the alternative sample testing plan for in use meters per PSC 185.761. The last major change-out program began in 1988 using a 20-year cycle. We are currently in a meter change-out program.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes.

If 6-inch or larger meters in commercial, industrial or public authority classifications have not been tested, please explain.

6" Meters not Tested:

1 - is not currently in service (it is in inventory).

The other meter was not tested in 2014. We will be working with Waukesha Memorial Hospital to find a way to test on-site. The meter is in a difficult location for running larger volume of water for testing.

Hydrants and Distribution System Valves (Page W-25)

General footnotes

WWU continues to test and operate distribution valves and hydrants following the DNR code NR810.

Explain all reported Adjustments.

An adjustment has been made to hydrants based on an audit between PSC records and the Utility's GIS records. The adjustment will adjust the number of hydrants listed to actual.

2. Definition of Wholesale Meter is any meter used to measure sales to other utilities for retail or wholesale sales.
3. Retail customer meters should not be included in this inventory and conversely these station and wholesale meters should not be included in the customer meter inventory.
