# ANNUAL REPORT

OF

Name: CITIZENS TELEPHONE COOPERATIVE, INC.

---

Principal Office: 143 E MAIN ST  
P.O. BOX 127  
NEW AUBURN, WI 54757-0127

---

For the Year Ended: DECEMBER 31, 2000

---

## TELECOMMUNICATIONS UTILITY TO PUBLIC SERVICE COMMISSION OF WISCONSIN

P.O. Box 7854  
Madison, WI 53707-7854  
(608) 267-9504

*This form is required under Wis. Stat. § 196.07. Failure to file the form by the statutory filing date can result in the imposition of a penalty under Wis. Stat. § 196.66. The penalty which can be imposed by this section of the statutes is a forfeiture of not less than \$25 nor more than \$5,000 for each violation. Each day subsequent to the filing date constitutes a separate and distinct violation. The filed form is available to the public and personally identifiable information may be used for purposes other than those related to public utility regulation.*

## GENERAL RULES FOR REPORTING

1. Unless otherwise indicated, the information requested in this report should be taken from the accounts and other records in conformity with the Uniform System of Accounts prescribed by the Public Service Commission of Wisconsin in docket 05-US-102. The definitions and instructions contained therein should also apply to the report wherever applicable. A query or response concerning information contained in this report regarding any practice or transaction should not be construed as indicating conformity to accounting or other pertinent regulations.
2. Please follow all instructions and answer each question fully and accurately. Provide additional information as necessary to avoid misunderstandings or misleading responses. Abbreviations listed on page 6 may be used. However, please show the exact name of the respondent in full on the Identification and Ownership page.
3. Wherever information is requested in a "note", please show that information in the space provided, or make reference to the adjacent page or insert where the note may be found. Please also identify each note. Footnote capability is included in the annual report software program. Please use it where necessary to fully explain particulars in the annual report.
4. Numeric items are limited to digits (0-9). A minus sign "-" should be entered in the software program to indicate negative values. Do not use parentheses for numeric values. The program will convert the minus sign to parentheses when a hard copy of the annual report is printed. Negative values may not be allowed for certain entries in the annual report due to restrictions contained in the software program.
5. Please report all dollar amounts to the nearest whole dollar.
6. This annual report should be complete in all respects. Unless otherwise authorized, avoid references to returns of former years or to other reports.
7. Wherever schedules call for data from the previous year and such data were reported in the previous annual report, that previous year's data should be reported without modification. If modified, an appropriate footnote indicator and explanation should be included in the current year's annual report.
8. Where part or all of the report is prepared by other than utility personnel, a disclosure is required in the "Individual or firm, if other than utility employee, preparing this report" portion of the Identification and Ownership schedule, which describes the nature and extent of work performed.
9. Please print a hard copy of the annual report on 20 pound or heavier paper, sign it and compare with the electronic copy before officially filing it with the Public Service Commission of Wisconsin.

## ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

<b>Access Line</b>	Central office line equipment, or equivalent, and all outside plant facilities, or equivalent, required to connect the serving central office with the customer premises via physical connection, frequency transmission, and/or time slot transmission. From an engineering perspective, a channel connection is at a DS0 level. A DS0 level is a 4 KHz voice channel or a 64 kilobits per second digital channel.
<b>Analog Signal</b>	A signal that varies in a continuous manner such as voice or music. An analog signal must be contrasted with a digital signal which can assume only discrete values.
<b>Cellular System</b>	A high capacity land mobile radio system in which an assigned frequency spectrum is divided into discrete channels that are assigned to a cellular geographic serving area.
<b>Central Office</b>	A switching unit in a telephone system providing service to the general public, having the necessary equipment and operating arrangements for terminating and interconnecting lines and trunks.
<b>Centrex</b>	A service for customers with many stations that permits station-to-station dialing, one listed directory number for the customer, direct inward dialing to a particular station and station identification on outgoing calls. The switching functions are performed in a central office (stand alone, host or remote).
<b>Channel</b>	An electrical communications path between two or more points. A single pair of wires may provide more than one channel. A channel may also be provided by microwave.
<b>Customer</b>	A person who uses a telephone as a subscriber.
<b>Digital Signal</b>	A signal that has a limited number of discrete states. This may be contrasted with an analog signal that varies in a continuous manner and may have an infinite number of states.
<b>Equal Access</b>	The ability of the subscriber to use any long distance service by dialing the same number of digits.
<b>Exchange</b>	A defined area served by one or more central offices regardless of technical serving arrangements within which the company furnishes service at rates and rules prescribed for that area in the company's filed tariffs. The area is not necessarily marked by political boundaries or the location of host or remote switching units.
<b>Extended Area Service (EAS)</b>	The ability of a customer to call customers in other exchanges at no additional charge or at an additional charge per tariff.
<b>Extended Community Calling (ECC)</b>	The ability of a customer to call customers in other exchanges at rates usually above EAS rates but below toll rates for comparable distances. Rates generally include a duration element.
<b>Feature Group A</b>	Line-side originating and terminating LATA access for which an originating subscriber dials an assigned telephone number that connects to a specific interexchange carrier (IC). The IC returns a tone to signal the caller to input additional generated digits of the called number.

## ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

<b>Feature Group B</b>	Trunk-side originating and terminating LATA access for which an originating subscriber dials a 950-WXXX number (where W=0, 1 and XXX is the carrier access code (CAC)), which is translated to a specific XXX carrier trunk group. Optional rotary dial service and ANI may be available.
<b>Feature Group C</b>	Trunk-side LATA access for AT&T-Communications generally on a direct basis between each end office (EO) and an AT&T-C switching system.
<b>Feature Group D</b>	Also referred to as equal access. It is trunk-side LATA access affording call supervision of an interexchange carrier, a uniform access code (10XXXXX), optional calling party identification, recording of access-charge billing details and presubscription to a customer specified interexchange carrier.
<b>FX-IN</b>	A nonswitched service where the customer of the company is connected to and receives switching service through central office equipment located in another exchange area.
<b>FX-OUT</b>	A switched service where facilities are provided from the central office out to the exchange boundary where it meets the line from a foreign exchange subscriber.
<b>Host Switching System</b>	A switching system that provides centralized control over most of the switching functions of one or more remote switching units. The host switching system usually provides trunk access to the operating company intraLATA networks.
<b>Local Access Transport Area (LATA)</b>	A geographic area within which an operating company may offer its telecommunications services.
<b>Mobile Telephone</b>	A service which provides radio telephone communication from a mobile vehicle to another vehicle or to a regular telephone.
<b>Paging</b>	A service which provides one-way signal or voice communication over a radio channel to a miniature receiver carried by the customer.
<b>Pair</b>	Two wires of a single circuit.
<b>Pay Station</b>	A telephone which normally requires all users to deposit one or more coins or use a credit card to complete a call.
<b>Private Line Service</b>	Channel or circuit rented for private use and not intended to be connected to the general distribution system.
<b>Private Branch Exchange (PBX)</b>	A manually, or operator controlled switching system, usually on the customer's premises, which serves that customer's telephones over a common group of lines from the central office.
<b>Radio Common Carrier (RCC)</b>	A company which furnishes public telecommunications service using one or more radio channels.
<b>Remote Switching Unit (RSU)</b>	An electronic switching system that is remote from its host or control office. All of the central control equipment for the RSU is located in the host switching system.

## ANNUAL TELECOMMUNICATIONS REPORT GLOSSARY OF TERMS

<b>Route Miles</b>	Total number of route miles (to the nearest mile) of operating plant facilities including drop wire in the exchange. One route mile may consist of: <ol style="list-style-type: none"><li>1. One mile of roadway with any combination of outside plant facilities on any number of rights-of-way.</li><li>2. One mile of a cross country route with any combination of outside plant facilities.</li><li>3. One mile of point-to-point microwave or radio link.</li><li>4. One mile of plant on either side of a limited access highway or natural barrier, such as a navigable waterway.</li><li>5. One mile of joint use line where the utility either owns the facility or leases space.</li></ol>
<b>Stand Alone Switch</b>	A central office switch which has no remote switching units (RSUs) subtending it.
<b>Trunk</b>	A communications path connecting two switching systems in the establishment of an end-to-end connection.
<b>Wide Area Telephone Service (WATS)</b>	Customer leased access line or lines connected to the nationwide network over which an unlimited number of calls can be made for a fixed monthly charge.
<b>Wire Center</b>	The location of one or more local switching systems. A point at which customers' loops converge.

### TELECOMMUNICATIONS PLANT IN SERVICE CLASS A & B (SUB-CLASS ACCOUNTS)

Report telecommunications plant data for each subaccount where primary plant accounts have subclassifications. Amounts pertaining to subaccount 2212.4, Test Equipment, should be reported in account 2212.2, Digital Switching - Central Office; amounts for subaccounts 2231.3, Microwave, 2231.4, Cellular, 2231.5, Mobile Radio, and 2231.6, Paging, should be included in 2231.2, Other Radio Facilities; amounts pertaining to subaccounts 2232.4, Digital Data Services, 2232.5, Digital Circuit - Subscriber, 2232.6, Digital Circuit - Trunk - Toll, and 2232.7, Concentrators, should be reported in 2232.1, Digital Circuit Equipment. Any other separate accounting for telephone plant at an individual telephone company should be consolidated and reported in the primary accounts as defined in the uniform system of accounts.

### SERVICE DATA

Access Line--Central office line equipment, or equivalent, and all outside plant facilities, or equivalent, required to connect the serving central office with the customer premises via physical connection, frequency, and/or time slot. From an engineering perspective, a channel connection is at a DS0 level. A DS0 level is a 4 KHz voice or 64 Kilobits/second. Customer--A person who uses a telephone as a subscriber.
