### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1998 Analytical Review DWCCA-3125-PJL

Dear Mr. Simon:

The Public Service Commission has completed their analytical review of your 1998 annual report. The primary purpose of our analytical review is to detect possible accounting related errors and to identify significant fluctuations from prior year's data, which are not sufficiently explained in the footnotes of your annual report. With the exception of the following paragraph, we found no problems in our review. You may consider our review closed. Thank you for your efforts in preparing your 1998 annual report.

Your 1998 annual report was filed after the due date of April 1, 1999. Wis. Stat. § 196.07(1) require annual reports to be filed on or before April 1st. If a utility fails to file an annual report by the due date, the PSC may prepare the report from the utility records charging the utility all expenses in preparing the report, plus a penalty equal to 50% of the amount of the expenses. Please implement time tables for closing of your 1999 financial records and completion of the financial audit to enable timely filing of your 1999 annual report.

Thank you for your efforts in preparing your 1998 annual report. You may consider our review closed. If you have any questions, please feel free to contact me at (608) 267-9198.

Sincerely,

Peter J. Leege

### Water Utility Plant in Service (Page W-08)

Note to Copy 2 of Page W-09

Adjustment to Services A/C 345

Add \$1,327 to correct for construction of two services in 1997 which were erroneously expensed in 1997.

Adjustment to Meters A/C 346

Add \$336 to correct for purchase of six meters in September 1997 which were erroneously expensed in 1997.

### Pumping and Purchased Water Statistics (Page W-10)

Note to Line 18, Copy 1

The well pump uses water as a lubricant for the pump and shaft. The equipment is designed so that water is run down the shaft just before and during the time the pump is operating. Several years ago the equipment ceased to function as designed. Instead, a hose was used to let water run down the pump shaft continuously; even when the pump was not running. This resulted in a sizeable amount of water being pumped which did not get into the system.

In late 1998 we had the equipment repaired to operate as intended when new. In other words, the water is used as a lubricant only when the pump is actually operating. The water superintendent said that it appears that we are now pumping about 3,000 gallons less per day since the equipment is fixed. Multiplying 3,000 gallons x 365 days = 1,095,000 gallons. In 1999 we will have had the benefit of the pump operating as intended for the entire year which should result in approximately 1,000,000 less gallons in the variance between water pumped and water sold.
