RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2000 Analytical Review DWCCA-2280-ELE

Dear Ms. Beil:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. We appreciate the response from Dennis Eder, Water Superintendent, to our January 4, 2001, letter about minimizing water loss. We understand that your utility will be repairing leaks as they are found and estimating the losses from them, meter testing will continue, non-metered customers will be metered or estimated, winter freeze prevention water will be recorded, and all public authority uses will be metered or estimated such as Fire Department usage, the town garage, park, skating rink, and main flushing. What progress has been made in these areas, particularly accounting for the public authority uses, and did freeze prevention water get recorded last winter? Since your unaccounted percentage is still at a high level, we will continue monitoring this and working with you as needed to help your utility improve in this area.
2. On Page W-5, \$52 is reported in Account 690, Uncollectible Accounts. In the future, this amounts reported in this account should also be deducted from the remainder assessment revenues (Page F-4, Line 5).
3. Enclosed is our calculation of the Public Fire Protection Service charge. It appears the municipality has been overcharged since 1998. Please adjust the 2001 Public Fire Protection Service charge to refund the amounts overcharged in 1999 and 2000, or otherwise explain this matter. (Report adjustment and explain on Page W-4, Line 4, in 2001).

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 266-3766. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient for you to do so. My e-mail address is engele@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.
