RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1. Per Russ Rath - no meters were tested. On the 2000 report, 3 was used as it was the number of new meters installed.

In the future, we will not put any numbers under tested unless they change their plan and purchase testing equipment.

2000 Analytical Review DWCCA-4910-PJL

Dear Ms. Marcucci:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. In review of Account 183, Other Deferred Debits, we noted that a balance was reported as "Sewer Repairs" and that a Public Service Commission (Commission) approval date was not included in the description. We are unable to verify that approval had been received regarding this item. Amortization can be continued for this item for accounting purposes only and does not bind the Commission to any specific treatment for this item in any future proceeding involving rates or other matters before the Commission. Past and current policy of the PSC is that all costs incurred in which the utility wishes to defer large or unusual costs for the purpose of amortizing as an expense over a future time period requires prior approval by the PSC. It is the responsibility of the utility to ensure that authorization is obtained from the PSC in a timely manner. It is recommended that requests for authorization to defer large or unusual expenses be done when costs are incurred rather than at the time the PSC Annual Report is being prepared. Please ensure that this is done in the future.

2. On October 13, 2000, in a conversation with Bruce Schmidt of our staff, Russ Rath stated that, instead of testing water meters the utility simply replaces them. We note however, that it is indicated on page W-17 of the 2000 report that three meters were tested during the year. Please explain if your plan to replace instead of test has changed.

3. During our review of the Income Statement Account Details schedule on page F-2, we noted that \$400 was reported in Account 418 and described as "Tower Rental." Please note that in the future income for tower rental should be reported in Account 474, Other Water Revenues on page W-4. Also,

FINANCIAL SECTION FOOTNOTES

any insurance refund such as the one in Account 421 on page F-2 should be credited to the insurance expense account unless the refund is for damaged plant in which case it would be reported as a credit to Accumulated Depreciation described as "Salvage."

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient for you to do so. My e-mail address is leegep@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service, property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

WATER MAINS

1. Report mains separately by pipe material, function, diameter and either within or outside the municipal boundaries.
2. Identify pipe material as: L (Lead), M (Metal for all other metal excluding lead), A (Asbestos-cement), or P (Plastic for plastic and all other non-metal excluding asbestos-cement).
3. Identify function as: T (Transmission), D (Distribution) or S (Supply).
4. Explain all reported adjustments as a schedule footnote.
5. For main additions reported in column (e), as a schedule footnote:
 - a. Explain how the additions were financed.
 - b. If assessed against property owners, explain the basis of the assessments.
 - c. If the assessments are deferred, explain.

WATER SERVICES

1. Explain all reported adjustments as a schedule footnote.
2. Report in column (h) the number of utility-owned services included in columns (c) through (g) which are temporarily shut off at the curb box or otherwise not in use at end of year.
3. For services added during the year in column (d), as a schedule footnote:
 - a. Explain how the additions were financed.
 - b. If assessed against property owners, explain the basis of the assessments.
 - c. If installed by a property owner or developer, explain the basis of recording the cost of the additions, the total amount and the number of services recorded under this method.
 - d. If any were financed by application of Cz-1, provide the total amount recorded and the number of services recorded under this method.
4. Report services separately by pipe material and diameter.

HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
 - a. Fire hydrants normally have a lead size of 6 inches or greater.
 - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.
