2000 Analytical Review DWCCA-6445-PJL

Dear Mr. Anderson:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. Please confirm that customers are billed for sewer service based on a flat rate, not based on volume of water usage.
2. During our review we noted 209 services in use reported in the Water Services schedule and 252 customers reported on page W-2. Please confirm that there are a significant number of services with multiple customers per service.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient for you to do so. My e-mail address is peter.leege@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

Peter J. Leege

Here's a response to your 2 questions re the Westport Water Utility.

1. Yes, sewer customers are billed at a flat rate. The sewer bills are not based on meter readings.
2. Yes, there are many customers in multi-unit buildings that have single services.
