RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

2001 Analytical Review DWCCA-3254-ELE

Dear Mr. Weber:

The Public Service Commission (Commission) staff has completed its analytical review of your utility's 2001 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors and also to identify significant fluctuations from prior years' data that are not sufficiently explained in the annual report. The analytical review did identify the following issue(s):

During our review, we noted the percent of water losses for your water utility was 30 percent in 2001. This loss is in excess of the Wis. Admin. Code PSC 185.85(4) ceiling of 25 percent for Class D water utilities. Our objective is to offer our assistance in determining the reason(s) for your high water loss and lend our support to acquire the resources to correct the problem.

Managing water losses is a project that might require some changes in your utility operations, planning and resource allocations. Perhaps you already have a plan or have budgeted resources to reduce your water losses. If so, please send or email us within the next 30 days a copy of your plan and/or information identifying the additional resources dedicated to addressing water losses.

If you do not have a plan, please refer to Attachment A included with this letter. This provides practical steps to address water losses. After consideration of these steps, please send or email us within the next 60 days a copy of a plan to address your water losses. If your utility does not own leak detection equipment, many consultants offer leak detection services. Another resource is the Wisconsin Rural Water Association (WRWA) that offers leak detection assistance to water utilities. You may call WRWA at (715) 344-7778. Commission staff is also available to provide further information or technical advice. If you have questions, please call Peter Feneht who may be reached at (608) 266-5614. E-mail water loss plans to peter.feneht@psc.state.wi.us and indicate in your response to the review letter that you have (or will) comply.

Responding to the questions posed from the analytical review does not preclude you from possibly receiving other inquiries from our office

regarding your annual report in the future: for instance, during a rate case, construction authorization, or other Commission reviews.

We appreciate your cooperation in providing the above information. If you have any questions, please feel free to contact me at (608) 266-3768. Please respond within the appropriate time frames listed above. We prefer that you respond by e-mail if it is convenient for you to do so. My e-mail address is elaine.engelke@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

WATER OPERATING REVENUES - SALES OF WATER

1. Where customer meters record cubic feet, multiply by 7.48 to obtain number of gallons.
2. Report estimated gallons for unmetered sales.
3. Sales to multiple dwelling buildings through a single meter serving 3 or more family units should be classified commercial.
4. Account 460, Unmetered Sales to General Customers - Gallons of Water Sold should not include in any way quantity of water, i.e. metered, or measured by tank or pool volume. The quantity should be estimated based on size of pipe, flow, foot of frontage, etc. Bulk water sales should be Account 460 if the quantity is estimated and should be Account 461 if metered or measured by volume. Water related to construction should be a measured sale of water (either Account 461 or Account 464).
5. Other accounts: see application Help files for details.
