### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

#### Identification and Ownership - Contacts (Page iv)

Hi Elaine

I'm finally responding to the 2002 report letter for Wisconsin Dells Water Utility. There were 4 points.

1. F-19 - We'll provide more detailed explanations in the future.
2. W-15/F-18 - It looks like the contribution should have been reported on F-18 as for services rather than for mains. It was one new service for a restaurant. It was assessed the actual cost.
3. W-17 - We will get an explanation if the meters were not tested.
4. W-7 - The other rate was for a tax increment district.

2002 Analytical Review DWCCA-6620-ELE

Dear Mr. Darling:

The Public Service Commission (Commission) staff has completed its analytical review of your utility's 2002 annual report. The primary purpose of the analytical review is to detect possible reporting or accounting related errors and also to identify significant fluctuations from prior years' data that are not sufficiently explained in the annual report. The analytical review did identify the following issues:

1. In the future, amounts greater than \$5,000, even grouped, reported on Page F-19 should be fully explained using other than account title or terms such as "miscellaneous", "other" or "due to/from general fund". Items may be explained with a short list.
2. A footnote to Page W-15 indicates that the utility financed main additions. However, an amount is reported on Page F-18 as a water mains contribution. Who contributed this amount and what was the basis of the charge?
3. On Page W-4, only one of the four 6-inch meters is reported tested. Meters 6-inch and larger in use are to be tested annually. Please test all four meters in 2003 or explain in a schedule footnote why all four were not tested.
4. On Page W-7, an other tax rate local is reported. Please furnish an

explanation as requested in the schedule head notes and follow this procedure in the future.

Responding to the questions posed from the analytical review does not preclude you from possibly receiving other inquiries from our office regarding your annual report in the future: for instance, during a rate case, construction authorization, or other Commission reviews.

We appreciate your cooperation in providing the above information. If you have any questions, please feel free to contact me at (608) 266-3768. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient for you to do so. My e-mail address is elaine.engelke@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

### PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service, property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.

### HYDRANTS AND DISTRIBUTION SYSTEM VALVES

1. Distinguish between fire and flushing hydrants by lead size.
  - a. Fire hydrants normally have a lead size of 6 inches or greater.
  - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
2. Explain all reported adjustments in the schedule footnotes.
3. Report fire hydrants as within or outside the municipal boundaries.
