### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

## SEWER OPERATING SECTION FOOTNOTES

---

### Sewer Operation & Maintenance Expenses (Page S-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

a/c #827 The sewer utility used less natural gas in 2004.

a/c #853 Insurance expense decreased because of the addition of the water treatment plant. The insurance is allocated based on the total value of the property. The water treatment plant added during the year had a high value. Therefore, the portion of the insurance allocated to sewer is less.
