### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

## WATER OPERATING SECTION FOOTNOTES

### Property Tax Equivalent (Water) (Page W-07)

If Lower Tax Equivalent authorized by municipality is greater than or equal to zero, please explain.

On June 10, 1999, the Village of Winter Board authorized a tax equivalent lower than the 1994 PSC report. This was decided by action at its Board Meeting. The Village decided that the tax equivalent is to be set at that amount as determined by using current tax rates and based on the actual calculation as prescribed by the PSC.

### Water Services (Page W-18)

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

The 2 services added were installed by the property owner and cost was estimated by the Director of Public Works based on the type of service installed.

### Meters (Page W-19)

Explain program for replacing or testing meters 1" or smaller.

Suspect meters chosen for testing are determined based on consumption changes. The utility will upgrade its testing program to comply with required levels.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Yes, they will be tested in 2005. The utility contracts for testing services on its larger sized meters and will have the station meters tested at the same time.
