### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

### PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service (total of utility financed and contributed plant), property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.

## WATER OPERATING SECTION FOOTNOTES

### Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

Account #630 - Per discussion with utility superintendent, the operation of well #10 requires a significantly higher amount of chemicals. Therefore in 2007 the utility didn't use well #10 as much as it had in 2006. This resulted in a much lower amount of chemicals purchased.

Account #650 - Increase due to inspection and repairs of well #6 and cleaning of mains.

Account #680 - The water utility supervisor spent more time working in the water utility in 2006 due to the construction of well #10.

Account #681 - Decrease due to better classification of expenses in 2007.

Account #682 - The 2006 balance included charges related to debt issuance, grant application fees, and grant administration costs. There were no such charges in 2007.

Account #684 - The prior year insurance allocation was based on an estimated percentage, in 2007 the allocation was based on actual expenditures

Account #686 - During 2007, the city changed its health insurance provider and its health insurance plan which resulted in lower premiums.
