### FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

Industry (a)	FTE (b)	
Water	1.0	1
Electric	0.0	2
Gas	0.0	3
Sewer	0.0	4

## RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

## WATER OPERATION & MAINTENANCE EXPENSES

---

### Water Operation & Maintenance Expenses (Page W-05)

If Fuel or Power Purchased for Pumping (620), divided by the Total kWh Used for Pumping on the Source of Supply, Pumping and Purchased Water Statistics schedule, is less than 3 cents or greater than 12 cents, please explain.

The fuel or power purchased for pumping divided by the total kWh used for pumping on the source of supply was just over 13 cents this fiscal year. The large decrease in the kWh used for pumping this year was due to the fact that a large business in the Village did not do any watering for about half the year. When the company did not water, decreases of around 100,000 gallons per day were seen.

For values that represent an increase or a decrease when compared to the previous year of greater than 30%, but not less \$2,000, please explain.

Account 650: In the current fiscal year the Village incurred repair and inspection costs related to Well #1. These repairs and inspections are not performed yearly which would explain the increase in repair expenses from prior year.

Account 682: In 2007 the water department had to replace a water main, in order to replace the main the Village had to hire a contractor to do some of the work. This was not a necessary expense for the Village in 2008 which explains the decrease in outside service expenses.

Account 686: There was a large increase in pensions and benefits in the current fiscal year due to the increase in the premiums on the insurance policies as well as an increased number of employees taking advantage of the benefits.

## PROPERTY TAX EQUIVALENT (WATER)

1. No property tax equivalent shall be determined for sewer utilities or town sanitary district water utilities.
2. Tax rates are those issued in November (usually) of the year being reported and are available from the municipal treasurer. Report the tax rates in mills to six (6) decimal places.
3. The assessment ratio is available from the municipal treasurer. Report the ratio as a decimal to six (6) places.
4. The utility plant balance first of year should include the gross book values of plant in service (total of utility financed and contributed plant), property held for future use and construction work in progress.
5. An "other tax rate" is included in the "Net Local and School Tax Rate Calculation" to the extent that it is local. An example is a local library tax. Fully explain the rate in the Property Tax Equivalent schedule footnotes.
6. The Property Tax Equivalent to be reported for the year is determined pursuant to Wis. Stat § 66.0811(2). Report the higher of the current year calculation or the tax equivalent reported in the 1994 PSC annual report, unless, the municipality has authorized a lower amount, then that amount is reported as the property tax equivalent.
7. If the municipality has authorized a lower amount, the authorization description and date of the authorization must be reported in the Property Tax Equivalent schedule footnotes.

### Meters (Page W-21)

Explain program for replacing or testing meters 1" or smaller.

The Village purchases used meters which are tested at the time of purchase by a third party.

The Village then tests the meters on a ten year cycle.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.
