FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

WATER AUDIT AND OTHER STATISTICS

1. Report actual metered values where possible. If water uses are not metered, estimate values for each line based on best available information. Water entering distribution system must equal the sum of Sales (line 5), Authorized System Uses (line 12) and Water Losses (line 19). For assistance, see AWWWW M36 Manual - Water Audits and Loss Control Programs.
2. For Gallons used in the treatment process (line 3), estimate water used in production including filter backwash, pumps, and other utility uses before the point of entry to the distribution system.
3. For Gallons used for other system uses (line 11), report other unmetered water used for system operation and maintenance, water used for non-regulated sewer utility and all other unmetered usage that is known to occur and does not fall into one of the other categories listed under Water Usage.
4. For Gallons unknown/not accounted for, estimate the volume of water losses due to other real or apparent losses, including customer meter inaccuracies, data errors, and unknown volumes. Unknown/unaccounted for volumes should be minimized to the extent possible.

Water Audit and Other Statistics (Page W-15)

General footnotes

Vendor-City of Milwaukee

Point of Delivery

On February 20, 1964 the Utility began receiving water at Glenview and Hawthorne Avenues. The water is metered at the Glenview Avenue plant meter pit, then carried by the supply main to the Potter Road reservoir.

On August 1, 1964 a connection was made between the City of Milwaukee's main and Wauwatosa's supply main located in W. Clarke St. The water is metered at the meter pit located at N. 62nd and W. Clarke Streets before entering the 1,700,000 gallon underground storage tank at the 64th Street plant, located 1/2 block south of Clarke Street.

On February 15, 1965 a connection was made at N. 60th and W. State Streets. The water is metered at this point and then carried by supply main to the Blanchard Street plant at 73rd and Blanchard.

Vendor-Milwaukee County

Point of Delivery

A transmission main of the County of Milwaukee is located in the central part of the City of Wauwatosa and customers in the City of Wauwatosa are served directly from this main, the water being metered by meters on the customers' premises. These meters are read quarterly and billed by the Wauwatosa Water Utility, then reported and paid to Milwaukee County.
