

COMPARISON OF QUARTERLY RESIDENTIAL CUSTOMER BILLS  
OF WISCONSIN WATER UTILITIES  
USING RATES IN EFFECT AS OF FEBRUARY 22, 2012

PUBLIC SERVICE COMMISSION OF WISCONSIN  
DIVISION OF WATER, COMPLIANCE AND CONSUMER AFFAIRS  
BULLETIN 25  
FEBRUARY, 2012

## FOREWORD

This report will provide the Public Service Commission (Commission) staff, the public, and the utility industry with a means of making approximate rate comparisons of Wisconsin public water utilities. It does this by giving net bills for standard quantities of water sold to residential customers of water utilities. To facilitate comparisons, the report groups water bills by class and computes a mean bill for each class and all classes combined. Effective January 1, 1995, utilities are classified based on number of customers. Class AB utilities are the largest utilities with 4,000 customers or more. Class C utilities serve between 1,000 and 3,999 customers. Class D are the smallest utilities with less than 1,000 customers.

To place all rates on a comparable basis, certain assumptions were necessary. These were as follows:

1. The table assumes the connection of a 5/8" or 3/4" meter.
2. Comparable quarterly bills were calculated for any utility having monthly, bimonthly, or semiannual rates.
3. Rates shown do not include direct charges for public fire-protection service.

The rates charged by the utilities included in this report are the general service rates that the utilities have on file with the Commission. Since 1996, general service rates may be increased by one of the following methods: (1) by an adjustment based on the change in a utility's cost of purchased water, (2) by Commission approval after a review and public hearing, or (3) by an inflationary factor using the simplified rate case process.

Rates (and therefore bills) can reflect the overall revenue requirement need of an individual utility. The revenue requirement is an amount necessary to recover the utility's operating expenses including a reasonable return on utility plant investment. Many factors determine expense level, some of which are beyond the control of utility management. It is not intended that this publication examine the many factors that cause differences in bills. Some factors, such as source of water supply, type of water treatment, water main and service extension policies, customer service levels, customer density, age and condition of plant, and degree of public fire-protection service can affect expenses and the price a utility must charge for its service.

In 2011 a table that compared large industrial and commercial customer's bills using a 4-inch meter is no longer included in Bulletin 25. A bill calculator can be found at the PSC web site, <http://psc.wi.gov/apps40/WaterBill/default.aspx>, which can be used to compare large customer water bills. If you have any comments or suggestions regarding this report, please direct them to Bruce Schmidt (608) 266-5726.
