

# Wisconsin 2006 ILEC Regulation

Alternative and price regulation plans have been adopted by many ILEC companies in lieu of rate of return regulation. Under the plans, in exchange for greater earnings and rate flexibility, companies commit to service quality standards and infrastructure investments and their territories are opened to competition. Under recent PSC rulings, Price Regulation is suspended for AT&T's 17 most urban exchanges, meaning that rates are no longer regulated at all in these areas.
