

Wisconsin 2006 ILEC Triple Play

2004 ILEC Triple Play

-  Triple Play Package Offered
-  Satellite TV Offered as Part of a Package
-  No Reported Triple Play Offering
-  Open or Unassigned Territory

Triple Play refers to a company's service package offering of Voice, Video and Internet service. These packages often have a discounted price when compared to purchasing the services individually. Different packages are available for purchase at different prices. CLECs and CATV often offer the same type of packages in their service territories. These are not shown on this map. Note: AT&T, Verizon and CenturyTel offer Direct TV in most areas, as part of their triple play offering (that type of offering is not shown on the smaller 2004 map above).
