### RETURN ON RATE BASE COMPUTATION

1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
3. Note: Do not include property held for future use or construction work in progress with utility plant in service. These are not rate base components.

1998 Analytical Review DWCCA-2280-PJL

Dear Ms. Beil:

The Public Service Commission (PSC) is in the process of completing an analytical review of your utility's 1998 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that our review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

During our review, we noted that the utility's water loss reported on page W-10, which was very high in 1997, is even worse in 1998, reported at 44%. Wis. Admin. Code § PSC 185.85 dictates that losses shall be no greater than 25% for a class D utility system. We recommend that an investigation of leaks be performed for the entire Glidden system. If budget and/or personnel constraints prevent your utility from completing this investigation in one year, you may try a phased approach over a number of years. One avenue of assistance for this problem that you may want to consider is the Rural Water Association of Stevens Point. We understand that they do not charge for their time in assisting utilities in investigating leakage and you do not need to be a member of the association to qualify for help. Their number is (715) 344-7778. Their internet home page address is <http://www.wrwa.org>. You will note that they are providing several seminars throughout the state on leak detection between now and the end of the year.

For any questions on this recommendation, please contact Peter Feneht of our staff at (608) 266-5614. Please submit a plan to Mr. Feneht by October 1, 1999, describing your plan to investigate the water loss problem.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any other questions, please feel free to contact me at (608) 267-9198.

Sincerely,

Peter J. Leege
